

What Is The GEEL?

The Galanter Education Evaluation Lattice (the GEEL) is a patented, revolutionary evaluation technology that enables educators to accelerate a child's learning through assessment. The GEEL assesses the emerging skills of children in pre-K through grade 2 programs, using a dynamic learning format that appeals to children while informing teachers. Children spend about 30 minutes answering colorful, narrated, animated questions using a classroom computer connected to the internet. Teachers can choose between a pre-school readiness Lattice that assesses both a child's abilities with a computer and readiness for school, or a primary Lattice that assesses the Pre-K to 2nd grade learner.

Each time a child takes an assessment, the Lattice automatically generates a unique and individualized Narrative Report. This easy-to-read Report highlights a child's skill strengths and weaknesses, and offers teachers key next steps and suggested activities. Rather than *labeling* children, the GEEL Narrative Report *describes* them. Assessment results can help adjust current learning programs instead of merely judging the rate of failure.

The GEEL Provides Teachers with a Powerful Tool

- **Engages Kids**—Children embark on an engaging and personalized exploratory journey that adapts to their ability level by pinpointing what they already know and what they need to learn next.
- **Easy for Teachers**—Educators can administer the program to an individual, a small group or an entire class with minimal prep time. Results help tailor lesson plans, allowing for increased individualization.
- **Quick for Administrators**—The progress of a class, school or the entire district can be monitored easily through the GEEL's detailed reports.
- **Performance**—85% of teachers stated GEEL will significantly improve student performance.
- **Knowledge**—97% of teachers stated GEEL provides substantial and significant skills and knowledge to improve teaching. (source: Professional Development evaluation of CPI training)

The GEEL Saves Time and Reduces Work -- and Cost

- Reduces the need for costly Special Education services by providing the necessary data for pre-referral intervention. The GEEL helps to differentiate between students who "haven't been taught" or are developmentally delayed, and those who have limitations and constraints that require special assistance
- Reduces dependence on hiring substitutes to administer screening tests
- Eliminates labor-intensive hand scoring or any waiting for results
- Streamlines reporting paperwork via a printable Narrative Report for each student
- Enables progressive monitoring and a consistent record of performance and progress

The GEEL Qualifies for IDEA and NCLB Funds

- Strong Scientific Research Base
- The GEEL can be used as part of Special Education, Gifted & Talented, Assessment, Professional Development, or Technology programs.
